

## HD-35

### 手提式检针器

Portable type needle detector

#### 产品用途 Product usage

HD-35 可检测小件服装、手套、皮革、拉链等，也可以协助输送带机找出断针。  
The needle detector, HD-35, can detect small garments, gloves, leather and zippers and can also assist the conveyor belt to find out the broken needle.

#### 产品特点 Product usage

- |                          |   |
|--------------------------|---|
| 1. 探测区小，能准确找出断针。         | 1. Small detecting scope for accurately finding the broken needle.            |
| 2. 灵敏度有两极，便于检测不同衣物。      | 2. Two-grade sensitivity for detecting different kinds of clothes.            |
| 3. 采用蜂鸣声及指示灯报警。          | 3. Humming and indicator light for alarming.                                  |
| 4. 传感器采用强磁材料，使其灵敏度高，寿命长。 | 4. Highly sensitive and long-used sensor thanks to strong magnetic materials. |

#### 技术参数 Specification

产品型号 Item No.	HD-35
检测方式 Detecting method	磁感应式 Magnetic induction
检测能力 Detecting ability	Hi: Fe $\phi$ 0.8mm 距离检测面10毫米的范围 Low: Fe $\phi$ 1.0mm 距离检测面10毫米的范围 Hi: Fe $\phi$ 0.8mm sphere or above at 10mm height from detecting surface Low: Fe $\phi$ 1.0mm sphere or above at 5mm height from detecting surface
检测面积 Detecting area	25(W) $\times$ 50(D) mm
报警方式 Alarm method	蜂鸣、灯亮 Buzzers, lamp lights
电源 Power supply	9V干电池 9V battery
外形尺寸 Dimension	196(L) $\times$ 58(W) $\times$ 50(H) mm
重量 Weight	(Appr.) 212g

Contact
