

# Automatic Elastic Sewing Machine

## 自动接松紧带机器

SK-1009XJ

- Minimum size can sew 12CM
- Sew 12PCS every minute
- Maximum access to 6CM
- Use the flower prototype head. all use the SMC cylinder
- 最小尺寸能车缝12CM
- 每分钟能车缝12PCS
- 最长能接6CM
- 使用花样机机头 全部使用SMC气缸

## DESCRIPTION 特点

High-speed automatic splicing rubber band function accurate alignment, high-speed automation one-time completion of tailoring, splicing, multi-needle sewing and automatic material collection, to achieve high production capacity;

After the length, width and quantity of the rubber band are set up on the intelligent touch screen, the rubber band is automatically transmitted through the equipment;

High-speed automatic tailoring, splicing at the same time, multi-needle sewing.

高速自动拼接橡筋机能精准对齐，高速自动化一次性完成剪裁、拼接、多针缝制和自动收料，实现高产能；

智能触摸屏设置好橡筋带长度、宽度和数量后，橡筋带经过设备自动传输；

高速自动剪裁，拼接同时，多针缝制。

## MACHINE CLASS 机械类型

Machine needle	DP × 5
Voltage	Standard AC single phase 220V
Control device	Sequence controller
Air capacity	0.5Mpa (72PSI) 50L/min
Shape size	122 (length) × 122 (width) × 168 (height) cm
Net weight	266KG
